ROUND TABLE: IMAGINARIES OF CLIMATE FUTURES AROUND THE WORLD. PERSPECTIVES FROM THE DIFFERENT GLOBAL CENTRES

Climate futures are imagined differently around the world, for lots of reasons like historical responsibility for climate change, climatical conditions, cultural background, economic situation. Within this session, we will draw attention on five imaginaries from the five regions where Centres are located. How do they imagine a good climate future for all and how do they think should/could it be reached? After their 5-minutes impulses the speakers will discuss on their imaginaries and search for a common one that brings together the largest possible overlap.
